# About The Joint Learning Network (JLN)

The Joint Learning Network (JLN) for Universal Health Coverage is a vibrant community of 27 countries deeply engaged in practitioner-to-practitioner learning to jointly problem-solve, generate global knowledge, adapt pragmatic tools to a country-specific context and innovate pathways in their countries toward the goal of universal health coverage.

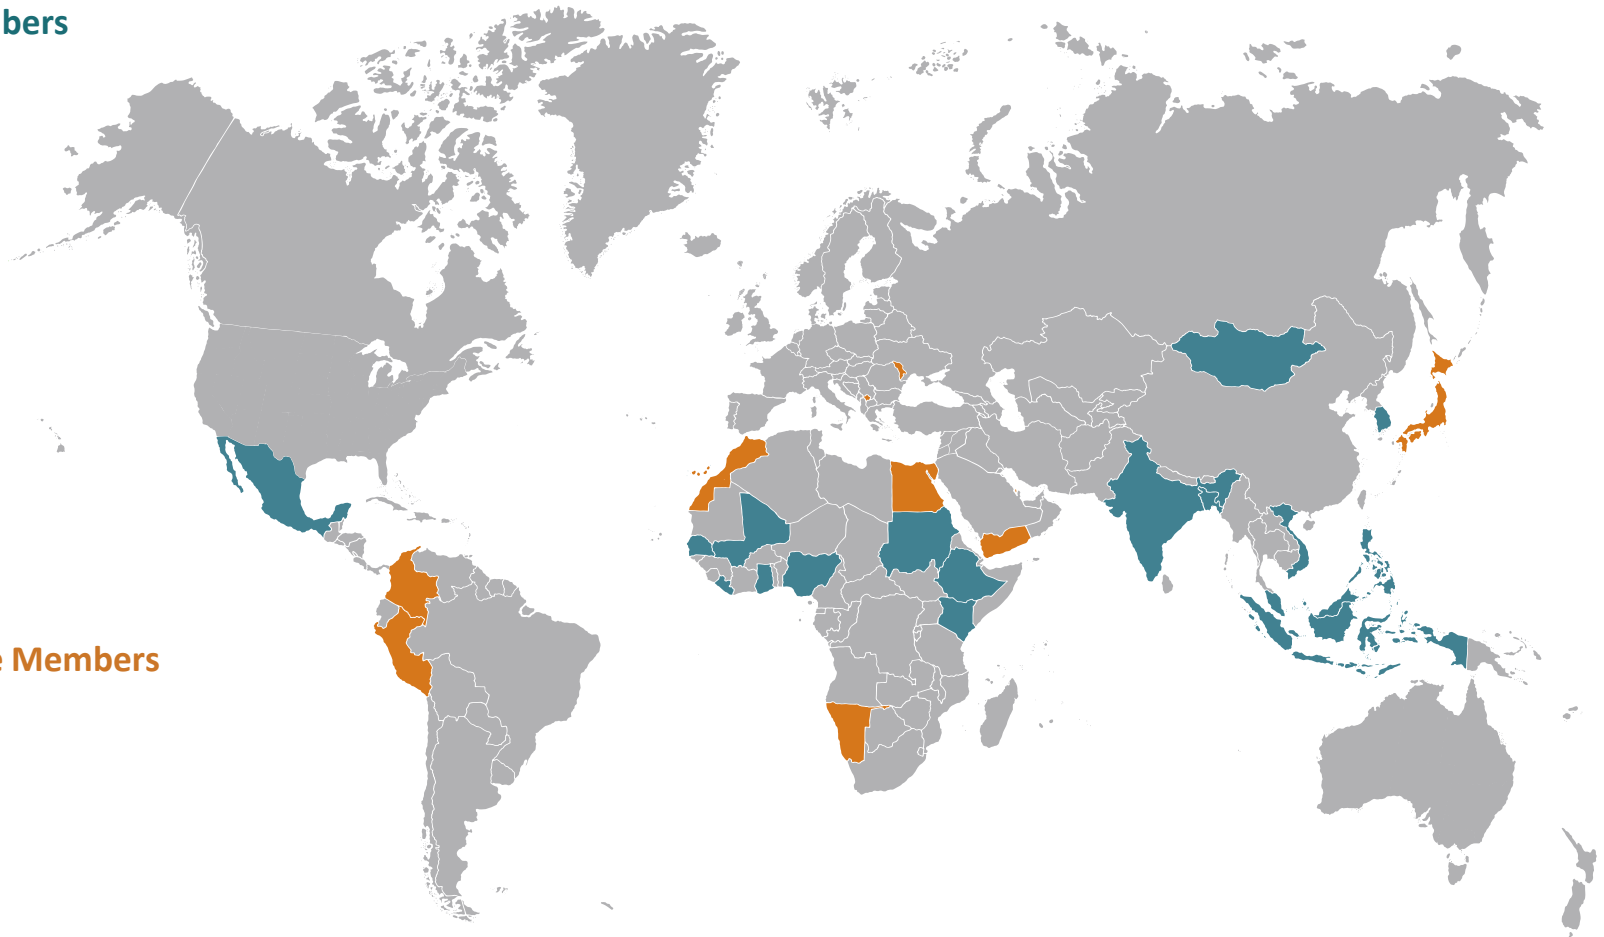

# A Growing Network of Policymakers and Practitioners

## Full Members

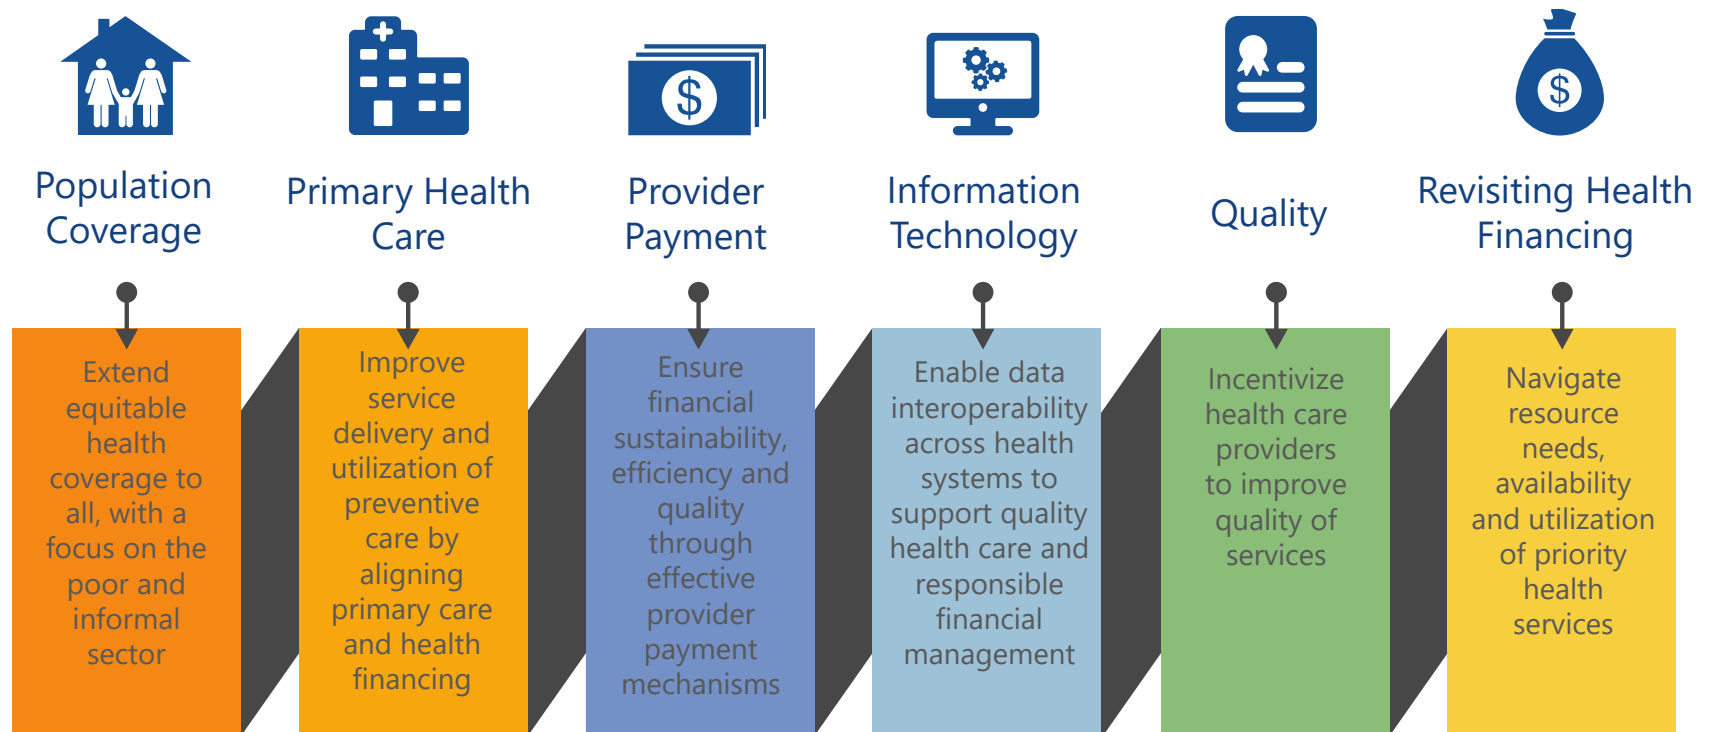

Bangladesh  
Ethiopia  
Ghana  
Indonesia  
India  
Kenya  
Liberia  
Philippines  
Malaysia  
Mali  
Mexico  
Mongolia  
Nigeria  
Senegal  
South Korea  
Sudan  
Vietnam

## Associate Members

Bahrain  
Colombia  
Egypt  
Japan  
Kosovo  
Moldova  
Morocco  
Namibia  
Peru  
Yemen

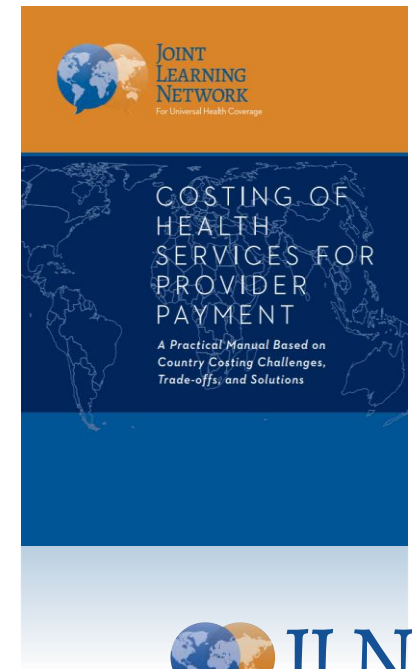

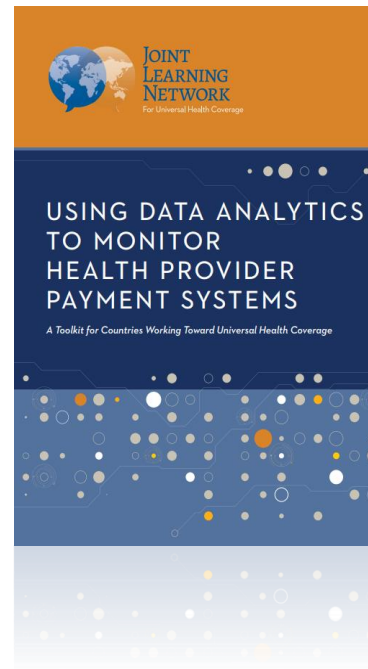

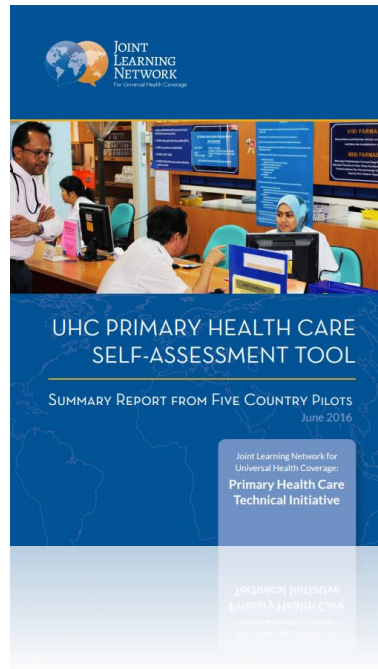

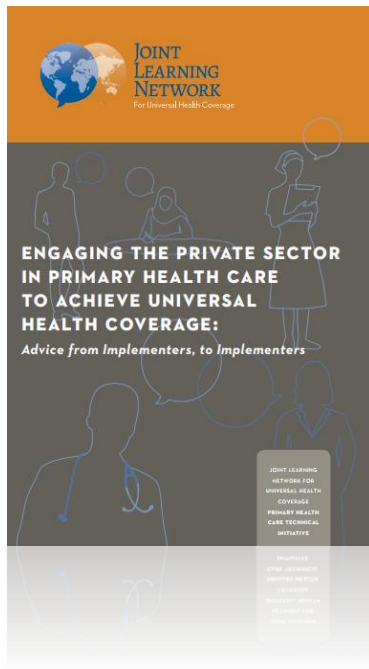

# JLN's Learning Priorities: Technical Initiatives

# JLN as a Global Source of UHC Knowledge

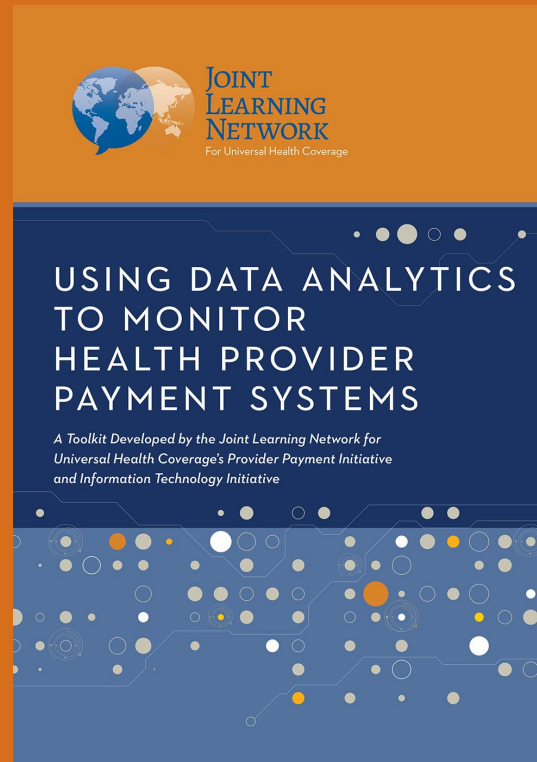

The JLN and its member countries have published over 60 knowledge products that address the practical how-to's of universal health coverage reforms.

# JLN Toolkit: Using Data Analytics to Monitor Health Provider Payment Systems

# Why a toolkit?

## The Need

- Most JLN countries implementing new or planning refinements to existing provider payment systems
- These systems rely on and generate large amounts of data, (provider claims and other routine reporting systems)
- Performance measures needed to monitor access, quality and effectiveness of services and efficiency of resource use

## The Reality

- M&E for provider payment is rarely adequate in practice; little guidance available from international experience
- Many countries do not use claims data and other routinely collected information to their fullest potential
- Issues include:
  - Data are held by different agencies
  - Purchasing entity lacks the staffing capacity or expertise

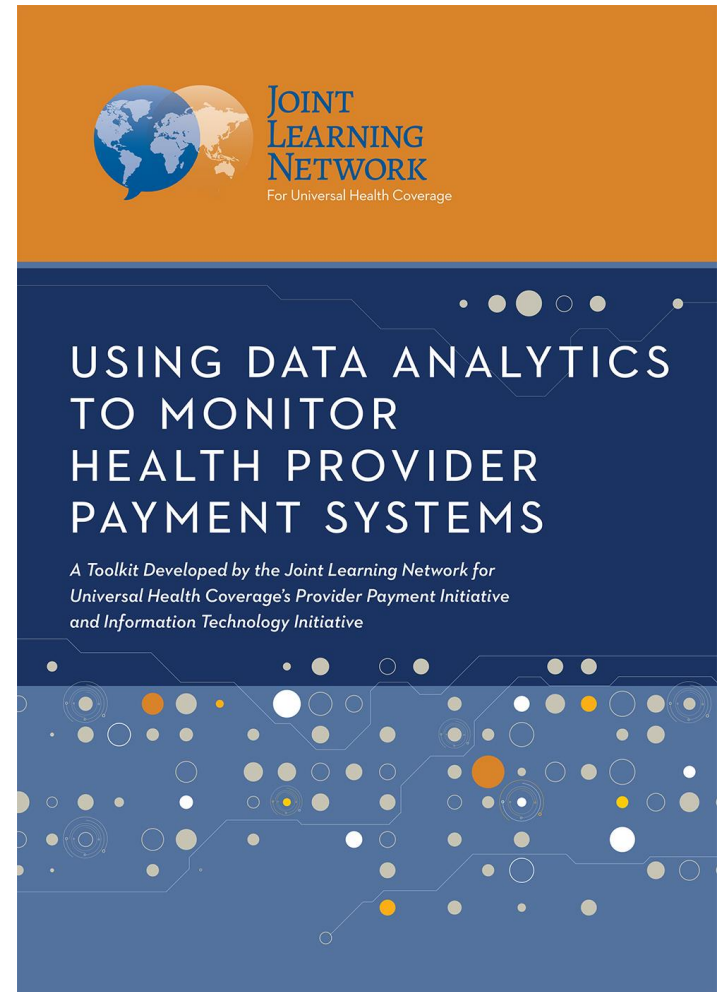

# Joint Collaborative with JLN PPM& IT Initiatives

## The Process

- Virtual collaboration and 3 in-person workshops
- Country representatives shared experience, expertise, and challenges related to monitoring health provider payment systems

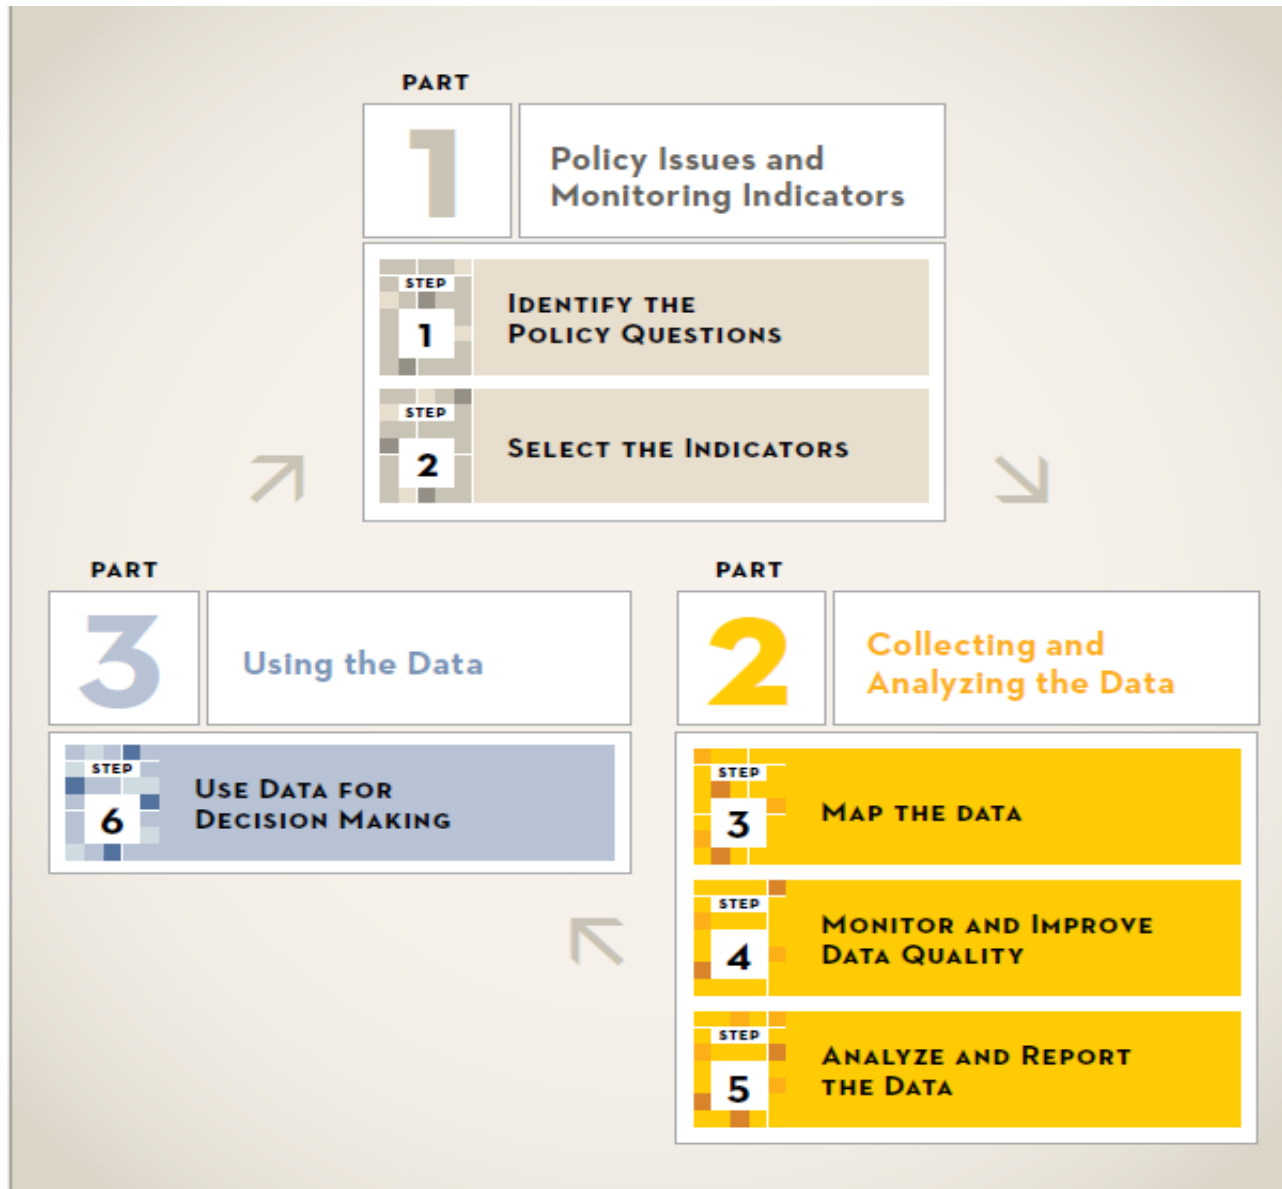

## The Product

- Facilitators collected best practices for developing indicators with real-life lessons from countries
- Final product (April 2017): toolkit that offers guidance, tools, templates, and other resources

# Toolkit Framework

## How does the toolkit achieve objectives?

- Presents a **framework** to identify and prioritize questions to monitor provider payment systems, generating and analyzing the data, and using the routine monitoring systems for decision making
- Provides **practical tools** based on country experiences for countries to adapt and use the framework to build their own provider payment monitoring systems

# JLN Resources

- <http://www.jointlearningnetwork.org/>
  - Resource database
  - Latest news and blogs
  - Upcoming events
  - JLN team (members and facilitators)

The JLN receives generous funding from the following partner organizations:
