

Revised Targeted Activities for the
DQU Collaboration
July to October 2019

The Gambia

Areas of focus in Data Quality and Use up to 31st October 2019

- Timeliness of reports submitted by regions into the DHIS2
- Addressing denominator issues in the country
- Capacity building of health workers in data management

Desired performance

- Timeliness of reporting increased from 68% to 80%
- Common denominator agreed by all stakeholders
- 50 health workers trained in data management

Intervention package

- Follow up with health facilities to submit data on time
- Engage regional data managers on timely entry of immunization
- Identify and Support technically to facilities/regions with poor track record.
- Finalising denominator through stakeholders meeting
- Train 50 health workers on data management

Action Plan

Activity	Responsible person	When	Indicators	Resources Available
Finalising denominator through stakeholders meeting	Data Quality Team (DQT)	August 2019	Common denominator agreed by all stakeholders	Yes
Engage regional data managers on timely entry of data	DQT/EPI	July-October 2019	Number of data managers engaged	No
Follow up with health facilities to submit data on time	Regional Health Directorates	July-October 2019	80% timeliness of reports in the DHIS2	No
Identify and Support technically to facilities/regions with poor track record	EPI and HMIS	July-October 2019	Number of health facilities supported	No
Train 50 health workers on data management	EPI and HMIS	October 2019	Number of Health workers trained on DM	Yes

Risks factors

- The release of funds could be delayed
- Stakeholders may not agree on a common denominator
- Other competing priorities may affect timeliness of data entry
